Introduction

The Special Education Continuous Improvement System is a compliance review process that provides an effective system of general supervision to (1) support practices that improve educational results and functional outcomes; (2) uses multiple methods to identify and correct noncompliance; and (3) uses mechanisms to encourage and support improvement as well as compliance. This model also supports efforts to improve student growth and achievement, close the achievement gap, increase graduation rate, and increase the number of student graduating from high school that are college and career ready to compete in our global society.
