PROGRAM GUIDE FOR:

MANUFACTURING CLUSTER

ALABAMA STATE DEPARTMENT OF EDUCATION CAREER AND TECHNICAL EDUCATION LISA BRUCE, EDUCATION ADMINISTRATOR TRIPP MARSHALL, EDUCATION SPECIALIST ASHLEY CRUM, ADMINISTRATIVE ASSISTANT (334) 694-4746

Manufacturing Cluster Program Guides

The Manufacturing cluster provides the knowledge and skills to equip students for careers in additive manufacturing, industrial maintenance, electronics, manufacturing, precision machining, and robotics. These courses include significant technical depth, engineering concepts and terminology. The Manufacturing cluster provides a safe and appropriate setting for student exploration and achievement. Students gain knowledge and skills through an active, structured, and stimulating environment coordinated with simulated workplace learning experiences. The Manufacturing cluster learning environment utilizes a variety of physical space to stimulate development of effective cognitive and psychomotor skills. Students experience a wide range of hands-on activities based on authentic representations of expectations found in the workplace. Theory and concepts are taught in proportion to the need for strong application opportunities with emphasis on timely learning experiences that facilitate the transition to skills attainment. Safety, proper tool use, and adherence to procedures are integral components for all student learning experiences.

				e 5 for additional details.

Additive Manufacturing Program Career (Must teach three courses from this program list within two years) Pathway Additive Manufacturing is based upon Computer-Aided-Design and 3-D Printing. This program provides students with the knowledge of Introduction, Program Intermediate, and Advanced Drafting Design Technology, Three-Dimensional Solid Modeling and Engineering Applications and the skill to be successful in the Mechanical and Technical Design fields. Course **Career Pathway Program Courses Career Readiness Indicator (CRI) In Demand Occupations** Number 21106G1033 Advanced Drafting Design • Alabama Certified Employee (ACE) • CAD Designer Career Pathway Project in Manufacturing 13997G1003 • Autodesk - AutoCAD Certified User Mechanical Designer CTE Lab in Manufacturing 13997G1001 • Autodesk - Fusion 360 Certified User • Technical Designer 21002G1001 Engineering Design Applications • Autodesk – Inventor Certified User 21106G1023 Intermediate Drafting Design • Solid Edge Certified Associate 21106G1013 Introduction to Drafting Design SolidWorks Associate 21004G1001 Introduction to Engineering Design 13001G1000 Introduction to Manufacturing 17049G1000 Safety and Health Regulations 21107G1012 Three-Dimensional Solid Modeling I 21107G1022 Three-Dimensional Solid Modeling II

Career Pathway Program	Electronics Program (Must teach three courses from this program list within two years) The electronics program covers a variety of topics including Electrical Theory; Electronic Components; Soldering-Desoldering and Tools; Block Diagrams-Schematics-Wiring Diagrams; Cabling; Power Supplies; Test Equipment and Measurements; Safety Precautions; Mathematics and Formulas; Electronic Circuits; Series and Parallel; Amplifiers; Interfacing of Electronics Products, Digital Concepts and Circuitry; Computer Electronics; Computer Applications; Audio & Video Systems; Optical Electronics; Basic Telecommunications; and Technician Work Procedures. Students will be prepared to earn entry level credentials recognized by the Electronics Technicians Association (ETA).

Industrial Maintenance Electrical & Instrumentation Program

Career Pathway Program

(Must teach three courses from this program list within two years) Industrial maintenance is divided into two distinct pathways, electrical and instrumentation and mechanical. Industrial maintenance technicians are needed in every industry that uses machinery, from automotive assembly plants to computer manufacturers. Not only do they repair and maintain electrical instruments and equipment, but they also install and dismantle them. Every time a new appliance leaves a factory, or a new car rolls off the line, a skilled industrial maintenance technician played a role in producing it. This program aligns with NCCER standards and covers topics such as Fasteners and Anchors, Process Mathematics, Pneumatic Controls, Oxyfuel Cutting, Introduction to Piping Components, and Laser Alignment.

Career Pathway Program	*SREB AC Automated Materials Joining Technology (Must teach three courses from this program list within two years.) Automated Materials Joining Technology allows students to use a project-based learning approach. Students will explore materials joining and forming methods, computer-aided design and automated systems that transform design concepts into fully developed products. Materials become more complex in chemical composition and structure, and the usefulness of many new materials is dependent upon improvements in joining science and technology.

Career Pathway Program	*SREB AC Integrated Production Technologies Program (Must teach three courses from this program list within two years.) Integrated Production Technologies allows students to apply what they learn in physics, chemistry and biology to real-world projects using emerging, cutting-edge materials. Students will work on the frontiers of product development by applying nanotechnology to new areas of need. Students will reengineer existing products to reduce the energy and material costs required to produce them, invent new products, and create more durable and efficient products using automated computer-aided design and manufacturing programs.

To meet the CCR Indicator as a CTE completer, a student must earn three (3.0) credits with the grade of a "C" or higher in CTE courses that are part of an approved CTE program of study. Additional requirements are outlined in <u>Memorandum FY22-2065</u>.

This matrix is intended for general guidance on the CCR completer status and is subject to change. For all CTE programming information, please refer to the CTE Cluster specific Program Guide. It contains a list of approved CTE programs, valid course numbers, required prerequisite courses, approved Career Readiness Indicators (CRIs) and in demand occupations.

*Courses are listed in alphabetical order, not in sequential order.
